The State of the Part —
Customized to Your Needs

Protectolite™ components are precision-formed in matched metal die molds ensuring exact fit when installed on site. Our modular designs allow for a high degree of component customization. It is easy to cut and install at the job site.

- Three-part simple installation
- Easily molded into simple or complex shapes
- All parts are precision formed in matched metal die molds
- Modular design allows for a high degree of component customization
- High strength-to-weight ratio
- Lightweight—30% lighter than aluminum
- Excellent corrosion and UV resistance
- Low coefficient of thermal expansion
- Ideal for outdoor use
